Rye Park Wind Farm Construction Update

Edition 25

Week commencing 17 October 2022

Construction Updates are released fortnightly and include a summary of construction works undertaken and a look-ahead of upcoming works.

The 396 MW Rye Park Wind Farm project is bringing investment and jobs to the region. Construction is disruptive so we are working as quickly and safely as possible to complete these works. We would like to thank the Rye Park community for your patience as we continue to review our construction methods for ways to further reduce the disruption.

We are progressing construction of the substation benches, hardstands and foundations. The internal ARDG quarries continue to supply gravel while our northern batch plant provides concrete for foundation pours. One foundation pour is scheduled this week (weather permitting). Internal overhead line pole erection works are also continuing along with the start of Oversize-Overmass (OSOM) wind turbine component deliveries.

Expect minor delays and diversions on Grassy Creek Rd, Yass St and Dalton Rd. Please follow traffic controls and road work speed limits.

Grassy Creek Road Works: Users should continue to expect increased construction traffic. Maintenance on flood damage areas will continue until rectification works have been completed. Additional remediation works are planned to commence with the Project targeting to repair all the outstanding defects by December.

Boorowa Road Works: Ongoing maintenance along Boorowa-Rye Park Rd will continue with a pothole maintenance program next reporting period. Repair and reconstruction works on sections of the road that have failed are due to commence in this reporting period (weather permitting).

Dalton Road: Pothole maintenance will continue during the next reporting period. The damaged section south of Rye Park Village is scheduled to be repaired in the coming weeks. Repair and reconstruction works on sections of the road that have failed are due to commence in the upcoming period.

Cooks Hill Road: A regrade of the unsealed section of Cooks Hill Rd was completed on 30 September, noting continued deterioration of the road condition as wet weather conditions persist. Design for the full upgrade has been agreed with Council and will require minor clearance of some vegetation in the road reserve. Works are scheduled to commence with tree clearing and drainage installation in this reporting period, pending final planning and Council approvals.

Yass St, Rye Park: Pothole maintenance areas along Yass St will continue

Rye Park Wind Farm Construction Update

Edition 25

Week commencing 17 October 2022

Construction Updates are released fortnightly and include a summary of construction works undertaken and a look-ahead of upcoming works.

Wind Turbine component deliveries: Wind turbine component deliveries are planned to start Wednesday 19 October. As per the Traffic Management Plan, between 5am – midday, turbine components will enter the region from Lachlan Valley Way via the Boorowa Bypass towards Rye Park Site entry 2. The deliveries will be under police escort and pilot vehicles the entire way and will travel in convoys to minimise road disruption time. Please follow the traffic controls if you come across the delivery convoys.

The Outpost food van at the Rye Park Rec Ground is open selling coffee and food from 7am to 3pm, Monday to Friday. Phone ahead to place your order to save time – call Pete: 0416 941 713

Towers and blades onboard for delivery
