

Rye Park Wind Farm Construction Update

Week commencing 23 January 2023

Construction Updates are released fortnightly and include a summary of construction works undertaken and a look-ahead of upcoming works.

Page 1 of 2

The 396 MW Rye Park Wind Farm project is bringing investment and jobs to the region. Following a welcome break over the holiday period our construction crews are returning to site. We would like to thank the Rye Park community for your support to date and are looking forward to seeing the wind farm taking shape over 2023.

Oversize-Overmass (OSOM) wind turbine deliveries

Turbine component deliveries will continue Monday through Saturday. Where possible we will schedule OSOM deliveries prior to school zone exclusion times.

Please allow extra time for your journey if travelling on the OSOM route in the morning.

Some tips when approaching an OSOM delivery:

- Reduce your speed
- Prepare to stop if necessary
- Be patient. Do not overtake, you will be given an opportunity to pass when it is safe
- Be prepared for unexpected wind buffeting when given the opportunity to pass
- Follow instructions given by the traffic escort

Gassy Creek Road and Yass Street causeway

We're undertaking further temporary repairs on Grassy Creek Road and the Yass Street causeway. We're also reviewing the design on damaged sections of Grassy Creek Road before putting a permanent fix in place. This design will be developed in consultation with council to ensure it is an appropriate long-term solution.

Cooks Hill Road

Upgrade works are planned including stump grinding and gravel placement.

Road maintenance

Repair works and upgrades continue with regular maintenance grades on unsealed roads used by project vehicles. Expect delays and diversions on the following roads:

- Grassy Creek Road
- Rye Park Road

Please follow traffic controls and road work speed limits.

Rye Park Wind Farm Construction Update

Week commencing 23 January 2023

Construction Updates are released fortnightly and include a summary of construction works undertaken and a look-ahead of upcoming works.

First turbine installed

This week saw the first turbine installed on site. This is the first of 66 turbines that will generate enough clean energy to offset almost one million tonnes of emissions every year.

Special thanks to the Rye Park and Boorowa community for your support in achieving this significant milestone.
