

# Rye Park Wind Farm Construction Update

**October 2023**

*Construction Updates are released monthly*

Page 1 of 1

The 396 MW Rye Park Wind Farm project is bringing investment and jobs to the region. We would like to thank the Rye Park community for your continued support and patience as we work towards operations in mid 2024.

## Wind Turbine Progress

The last month has been slightly slower than planned with 41 turbines now installed and another 9 ready for the nacelle and blades to be attached. As part of the commissioning process we are continuing our fit out and testing of the turbines to make sure they are performing as expected. For the rest of the year you will continue to see different turbines spinning as we test them and step up generation following hold point testing.

## Bird and Bat adaptive Management Plan

The Bird and Bat adaptive Management Plan (BBAMP) search program is now underway. This search plan involves an ecologist and specialist dog undertaking monthly monitoring of select wind turbines and using the data to inform and refine our bird and bat adaptive management plan.

## Oversize-Overmass (OSOM) wind turbine deliveries

Turbine component deliveries continue Monday through Saturday. OSOM deliveries are now also using the main site entry. Please allow extra time for your journey if travelling on the OSOM route in the morning. Tips for approaching an OSOM delivery:

- Reduce your speed and prepare to stop if necessary
- Be patient. Do not overtake, you will be given an opportunity to pass when it is safe
- Be prepared for unexpected wind buffeting when given the opportunity to pass
- Follow instructions given by the traffic escort

If you have any questions or concerns about the Project, please contact:

**Tilt Renewables Site HSEC Manager** Andrew Galland                      0447 076 886

**Zenviron Site Manager** Bruce Cunningham                              0409 656 159

**Vestas Site Manager** Jason Penny    0436 930 270
