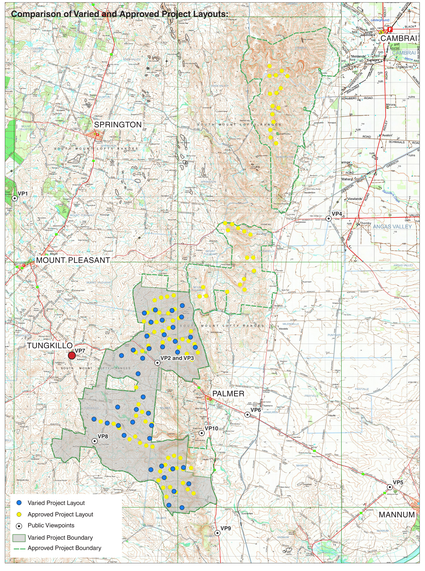
Varied Project

Approved Project

Comparison of Varied and Approved Project Layouts:



The photomontages have been developed using a best practise approach in order to provide an indication and comparison of the potential visual effects that may result from the development of the Approved and Varied Project Layouts for Palmer Wind Farm.

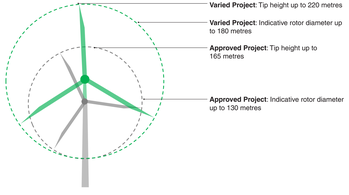
The photomontages represent realistic comparative imagery of the two wind farm layouts and includes vegetation, local landforms and buildings in the landscape.

Notes:

• Eastings position (MGA):	323522
• Northing position (MGA):	6144285
• Elevation of viewpoint (m):	422m
• Height of camera above ground:	1.57m
• Date photograph was taken:	22/09/2023
• Time of day:	11:31am
• Focal length of camera: (equivalent to 50mm analogue)	35mm DSLR
• Distance to closest turbine:	3km
• Bearing to closest turbine:	091°
• Horizontal field of view:	120°

VIEWPOINT 7
BRINKWORTH ROAD & MEMORIAL DRIVE

Maximum Wind Turbine Sizes :



Varied Project: Tip height up to 220 metres

Varied Project: Indicative rotor diameter up to 180 metres

Approved Project: Tip height up to 165 metres

Approved Project: Indicative rotor diameter up to 130 metres
