

# Fortnightly Construction Update - # 66

## Dundonnell Wind Farm

The Tilt Renewables team is continuing with the construction of the \$560 million Dundonnell Wind Farm, located approximately 23 kilometres north-east of Mortlake, in the Western District of Victoria. AusNet Services have constructed 38 kilometres of 220kV transmission line and a substation, which connects the wind farm to the electricity network.

The Project is now able to test all 80 turbines simultaneously after having moved to a 150 MW hold point, as part of the commissioning sequence required by the Australian Energy Market Operator.

With site works nearing completion, focus is on rehabilitation and project close out works. The on-site quarry rehabilitation works are complete while there are ongoing works to rehabilitate temporary construction areas along the transmission lines (e.g. re-vegetation around the base of each pole). AusNet services will be managing these works.

### Expressions of Interest now closed for the Dundonnell Wind Farm Community Fund Committee

We will shortly announce via the Project webpage and October Newsletter the newly formed Committee who will help shape the structure of the fund, determine the guidelines and establish a vision for how the annual contribution of \$50,000 will be distributed among small, largely non-profitable organisations and individuals in the community. Please check the webpage for the latest information: [www.dundonnellwindfarm.com.au](http://www.dundonnellwindfarm.com.au) or sign up to the newsletter.

**COVID-19:** While commissioning and rehabilitation works continue on site, specific measures are being implemented to reduce the risk of spread of COVID-19. Tilt Renewables and contractors are closely monitoring these measures and changes to the wider situation as they develop. The measures put in place will be frequently reviewed and amended as required.

### News Piece of the Week:

*This will be our last fortnightly construction update. From now on updates will be shared via our newsletter that is distributed every second month, with the October newsletter coming soon. Please subscribe to receive the newsletter by email or post, by contacting us at: [dundonnellwindfarm@tiltrenewables.com](mailto:dundonnellwindfarm@tiltrenewables.com)*

Spring weather – snowing on site!
